

A scientifically researched,  
multi-discipline, immersion experience.

## THE "IDEAL YOU" SERIES

# HYPNO-DOCTOR

**Imagine! Being happier, healthier, wealthier & adding  
up to 50 points to the IQ...easily!**

The "Ideal You" series includes six different targeted programs that can be customized through personal subliminal text scripts, optimized visual anchors, and scientifically developed audio with brain entrainment media content.

- The Romantic Self - "Deal with Personal Romance"
- Active & Confident - "Energize Your Approach to Life!"
- The Family Factor - "Getting a Grip on the Parental Mind"
- Inner Einstein - "Unleash the Inner Genius"
- Millionaire Mind - "Financial Abundance for Life"
- Weight Loss - "Shed the Weight, Find the new You!"

### Prime Your Mind by Changing Your Mental State

Hypno-Doctor™ first primes the mind with audio brain entrainment. Audio with Brain Entrainment is the ability to use audio to manipulate a person's brainwaves. Scientists found that a human brain exposed to an audio frequency will cause the brainwaves of the subject to synchronize with the rate of the audio frequency.

### Deliver Message: "Subliminally Communicate to the Subconscious Mind"

Subliminal Text is simply exposing the user to text flashing faster than they can consciously process the meaning of the text. The properly worded suggestions are delivered to the subconscious mind and systematically break down negatives while replacing them with positives.

Through Repetition Hypno-Doctor™ has the ability to leverage the "mere exposure effect" by cycling through each of the 60 direct suggestions 10 times within a single 30 minute session.

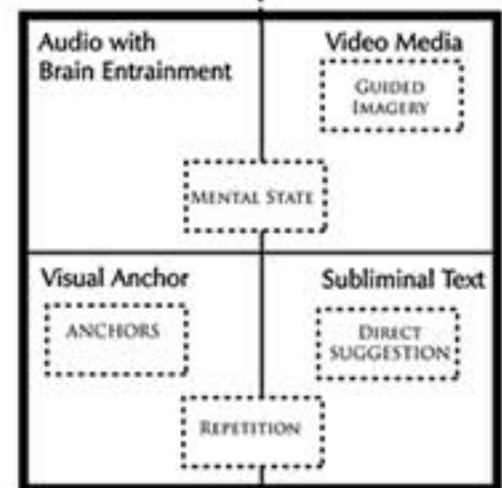

Masking. If you stare directly at a light for a few seconds and then close your eyes, you will see a visual afterimage. This issue can cause problems for subliminal delivery software on slower machines. In order to compensate for this limitation, masking is used to counteract the visual afterimage after retinal activation. This is accomplished by subjecting the patient to an additional random image immediately after the subliminal stimulus is presented. The mask acts as camouflage by interrupting the visual afterimage during retinal activation.

### Reinforce Message: "Create Associations for Lasting Change"

The NLP Glossary defines "anchors" as any stimulus that is associated with a specific response. Anchors can be set up intentionally and is the process of associating an internal response with some external trigger, similar to classical conditioning, so that the response may be quickly reaccessed.

Hypno-Doctor leverages guided imagery so the mind can affect the body when visualized images evoke sensory memory, strong emotions or fantasy. Imagery has been said to cause many positive types of changes in the body, including alterations in breathing, heart rate, blood pressure, metabolism, cholesterol levels and functions of the gastrointestinal system, immune system and endocrine system.

Through subliminal technology techniques, the brain is "re-trained" through a receptive, relaxed state-of-mind. Hypno-Doctor's scientific approach includes personalized guided imagery, repetition, direct suggestion & anchors that creates a complete immersive hypnotherapy experience.

THE GOLD STANDARD OF SUBLIMINAL SOFTWARE IS A GUARANTEE THAT THIS PURCHASED SOFTWARE IS OF THE HIGHEST DEGREE OF SOPHISTICATION, CONTENT, AND VALUE IN THE INDUSTRY TODAY.
